

Information Regarding Organizations with Entrepreneurial/Franchise Operations

Some organizations promote entrepreneurial/franchise opportunities. These opportunities may involve:

- a) no salary, but an opportunity for students to operate their own businesses or franchises
- b) compensation based mostly on commission remuneration rather than salary
- c) fees for training and/or materials to start a business or franchise
- d) penalties or fees for services if students breach employment contract terms.

Many students operate successful businesses through these opportunities but it is important to verify the terms and conditions of employment prior to acceptance.
